Antelope Canyon/Lake Powell

Antelope Canyon is one of the most photographed locations in the state. The Main Corridor, part of Upper Antelope Canyon, is located near Lake Powell in Northern Arizona. Over the years, wind and rain has slowly sculpted Upper and Lower Antelope Canyon. While sunlight finds its way down the 120-foot wall, landing on a sandy floor, photographers wait to capture the perfect shot. This is truly a spiritual place and to experience it first hand is spectacular. Both Upper and Lower Antelope are on Navajo land and so indigenous guides lead the tours, interpreting the beautiful rock formations and explain their relationship to their history.

Travel to Learn takes care of all the trip details so you can enjoy your time in nature!

Price is for **each participant** and based on the size of the group.

| 2 Participants | 4 Participants | 6 Participants |
|----------------|----------------|----------------|
| \$320/each | \$230/each | \$190/each |
